

# Imaging Anywhere

# Imaging Everywhere

## Open Up New Possibilities with Mobile MIM™

- Mobile MIM is a diagnostic imaging app for the iPad®, iPhone®, and iPod touch®.
- Imaging professionals now have a portable solution away from their workstations.
- Consult with peers for difficult cases and overreads.
- Reduce image distribution delays.
- Enhance referring physician and patient interaction.
- Never rely on ad hoc mobile viewing solutions again.
- Bypass the cost and headache of CDs.
- Give hands-on image access to tumor board or class members.

## Extend your PACS with MIMcloud™ and MIMcloud Assistant™

- MIMcloud securely hosts image data so users can maintain access while off-site.
- The free MIMcloud Express automatically routes PACS data transfers to MIMcloud.
- MIMcloud Express accepts standard DICOM transfers for institution-wide compatibility.
- MIMcloud Express is vendor-neutral and compatible with PC and Mac.
- A single server can route to multiple MIMcloud users or groups.
- All PHI is encrypted for transfer and storage (for HIPAA compliance).

### MIM Integrates with MIMcloud

MIMcloud compatibility is built-in to every MIM 6+ workstation, allowing you to manage studies, push and pull images, and easily share studies with others inside or outside your institution.

## Access your PACS with a MIM Server Solution

- A MIMpacs™ server can function as an imaging server for Mobile MIM.
- Configure MIM software to cache a subset of PACS data for mobile access.
- Access patient studies with fast searching and viewing.
- Keep data within your local network.
- Access data off-site with VPN or other network extensions.

### Simplify Using MIMpacs

With MIMpacs as your primary image storage solution, the setup is even simpler. Every study in MIMpacs is immediately accessible.

## Broaden your Horizons with MIMcloud

Access images from any Internet connection.

- Enhance teleradiology and multi-institution reading operations.
- Use MIMcloud as off-site backup.
- Share images with referring physicians, partner institutions, and patients.
- Collect or contribute images for clinical trials.
- Distribute images to users who don't have Mobile MIM using the MIMviewer® downloadable desktop software.
